The Aging Swallow

Offered by
Swallowing Diagnostics Inc.
This workshop is offered for 0.2 ASHA CEUs or 2 contact hours by the Board of Nursing.

This workshop will review the normal swallow and the consequence of age on the swallow mechanism. The impact of motor and sensory systems required for normal swallowing, gender differences and aging will be discussed. Video clips of Modified Barium Swallow studies will be utilized to expand on the concepts presented.

**Learner Outcomes**
At the completion of the workshop, attendees will be able to:

- identify characteristics of the normal swallow
- identify the impact of the motor and sensory systems for normal swallowing
- identify changes in swallowing associated with normal aging
- identify gender differences of aging
